REVIEWER ACKNOWLEDGEMENT

Scientific publishing relies heavily on the enthusiasm and commitment of a large number of individuals, in particular fellow scientists who give freely of their time and advice to ensure the standard of content and presentation for a peer-reviewed journal. It is through the efforts of these individuals that *Clinical Biomechanics* continues to develop and improve, as specifically indicated by the increasing impact factor (now 0.518).

The Editors and Publishers of *Clinical Biomechanics* would therefore like to take this opportunity to thank the members of the editorial board and the following reviewers for their invaluable help during 1995.

J Cunningham, L Durselen, C Frank, G Johnson, S Kumar, JC Mason, RJ Minns, JJ O'Connor, BB Seedhom, K Singer, IF Stokes and R Zernicke.

INDEX: VOLUME 10 1995

Clin. Biomech. Vol. 10, No. 8: 443-447, 1995

SUBJECT INDEX

- 2-dimensional analysis
 - walking, rearfoot motion, 3-dimensional analysis, 36
- 3-D PSD
 - asymmetry, human strength, TAFS, triaxial measurement, 59
- 3-dimensional analysis
 - walking, rearfoot motion, 2-dimensional analysis, 36
- abdominal muscle
 - posture, sitting, car seat, 73
- acceleration
 - orthotics, locomotion, pronation, impact loading, shock, 253
- ACL
 - biomechanics, elongation rate, failure properties, histology, 428
- ACL reconstruction
 - ligament tension, isometry, kinematics, knee surgery, 200
- anatomical frames
 - movement analysis, terminology, standardization, 171
- anatomy
 - mechanical stress, (normal) articular range of motion, peripheral nerve, 235
- ankle
 - electrogoniometer, kinesiology, knee, 275
- ankle joint biomechanics
 - ankle laxity, *in vivo*, 278
- ankle joint mechanics
 - shortening reaction, maintained stretch, collagen, viscoelasticity, range of motion, 166
- ankle laxity testing
 - in vivo*, ankle joint biomechanics, 278
- anterior cruciate ligament
 - electromyography, arthrometer, knee laxity, 421
 - mechanics, strength, stiffness, bodyweight, physiological loading 339
- architecture
 - neuroprosthesis, muscle, force-velocity, spinal cord injury, electrical stimulation, 149
- arm angle
 - isokinetic strength, isometric strength, pulling speed, preferred arm, 110
- arm flexion
 - shoulder load, endurance, muscle fatigue, neck-shoulder disorders, muscle rotation, biomechanical model, electromyography, 309
- arthrometer
 - knee laxity, anterior cruciate ligament, electromyography, 421
- articular cartilage
 - magnetic resonance imaging, FLASH-sequence, fat-suppression, patella, knee-joint, biomechanics, functional adaptation, osteoarthritis, cartilage thickness, 434
- artificial intelligence
 - neural networks, expert systems, automated diagnosis, foot pathologies, pedobarography, EMED, 385
- asymmetry
 - 3-D PSD, human strength, TAFS, triaxial measurement, 59
- automated diagnosis
 - foot pathologies, pedobarography, EMED, artificial intelligence, neural networks, expert systems, 385
- back muscle endurance
 - back strength test correlation, isokinetic lift, psychophysical lift, 325
- back pain
 - lumbar lordosis, goniometry, posture, lumbar spine, 222
- spinal mechanics, review, 3
- spine, pregnancy, posture, exercise, 98, 104
- back strength test correlation
 - isokinetic lift, psychophysical lift, back muscle endurance, 325
- balance
 - posture, falls, kinesiology, biomechanics, 318
- biomechanical model
 - electromyography, arm flexion, shoulder load, endurance, muscle fatigue, neck-shoulder disorders, muscle rotation, 309
 - lifting techniques, low back pain, spine, 128
- biomechanical properties
 - limb lengthening, skeletal muscles, 263
- biomechanical study
 - bone mineral density, femoral neck strength, femoral fixation strength, osteoporosis, dynamic hip screw, 304
- biomechanics
 - balance, posture, falls, kinesiology, 318
 - comparison, external fixation, 401
 - elastase, chondroitinase ABC, Dupuytren's disease, palmar aponeurosis, 29
 - elongation rate, failure properties, histology, ACL, 428
 - foot orthoses, shoes, plantar fasciitis, strain transducers, plantar aponeurosis, longitudinal arch support, 245
 - force plate, lift, load, lower back, motion analysis, 407
 - forces, gait, knee, moment, osteoarthritis, osteotomy, prosthesis, radiology, surgery, 217
 - functional adaptation, osteoarthritis, cartilage thickness, articular cartilage, magnetic resonance imaging, FLASH-sequence, fat-suppression, patella, knee-joint, 434
 - histology, dynamization, bone healing, external fixation, 227
 - histomorphometry, streptozotocin, rat, diabetes (type 1, insulin dependent), exercise, bone-ligament junction, 331
 - isokinetic, knee, joint load, rehabilitation, 208
 - shoulder joint, kinematics, muscle fatigue, 144
 - tendon, mesoscopic approach, 50
 - torsion testing, long bones, 441
- bodyweight
 - physiological loading, anterior cruciate ligament, mechanics, strength, stiffness, bodyweight, 339
- bone fracture strength
 - impacted fractures, femoral neck fractures, hip fractures, 268
- bone healing
 - external fixation, biomechanics, histology, dynamization, 227
- bone mineral density
 - femoral neck strength, femoral fixation strength, osteoporosis, dynamic hip screw, biomechanical study, 304
- bone-ligament junction
 - biomechanics, histomorphometry, streptozotocin, rat, diabetes (type 1, insulin dependent), exercise, 331
- calcaneal fractures
 - pressure distribution measurements, clinical gait analysis, clinical outcome, 345
- callus
 - fracture, fracture repair, physical stimulation, extracorporeal shock-waves, 374
- car seat
 - abdominal muscle, posture, sitting, 73
- cartilage thickness
 - articular cartilage, magnetic resonance imaging, FLASH-sequence, fat-suppression, patella, knee-joint, biomechanics, functional adaptation, osteoarthritis, 434
- chondroitinase ABC
 - elastase, Dupuytren's disease, palmar aponeurosis, biomechanics, 29
- cineradiography
 - lumbar spine, intervertebral disc, continuous deformation behaviour, *in-vivo*, strain distribution, flexion, extension, 193
- clinical evaluation
 - spine surgery, image guidance, computer-assisted surgery, pedicle fixation, 293
- clinical gait analysis
 - calcaneal fractures, pressure distribution measurements, clinical outcome, 345
- clinical outcome
 - clinical gait analysis, calcaneal fractures, pressure distribution measurements, 345
- collagen, viscoelasticity
 - range of motion, ankle joint mechanics, shortening reaction, maintained stretch, 166
- comparison
 - external fixation, biomechanics, 401
- computer keyboard
 - tendon biomechanics, creep, tendinitis, 67
- computer-assisted surgery
 - pedicle fixation, clinical evaluation, spine surgery, image guidance, 293
- continuous deformation behaviour
 - in-vivo*, strain distribution, flexion, extension, cineradiography, lumbar spine, intervertebral disc, 193
- creep

- in vitro*, lumbar spine, lumbar extension, 363
tendon biomechanics, tendinitis, computer keyboard, 67
diabetes (type 1, insulin dependent)
exercise, bone–ligament junction, biomechanics, histomorphometry, streptozotocin, rat, 331
diagnosis
mechanical stress, (normal) articular range of motion, peripheral nerve, 240
Dupuytren's disease
elastase, chondroitinase ABC, palmar aponeurosis, biomechanics, 29
dynamic hip screw
biomechanical study, bone mineral density, femoral neck strength, femoral fixation strength, osteoporosis, 304
dynamization
bone healing, external fixation, biomechanics, histology, 227
elastase
chondroitinase ABC, Dupuytren's disease, palmar aponeurosis, biomechanics, 29
elderly
gait analysis, physical activity, muscular strength, 41
electrical stimulation
architecture, neuroprosthesis, muscle, force-velocity, spinal cord injury, 149
electrogoniometer
fracture stiffness, tibia, fracture healing, non-invasive, mechanical, functional brace, 395
kinesiology, knee, ankle, 275
electromyography
arm flexion, shoulder load, endurance, muscle fatigue, neck–shoulder disorders, muscle rotation, biomechanical model, 309
arthrometer, knee laxity, anterior cruciate ligament, 421
elongation rate
failure properties, histology, ACL, biomechanics, 428
EMED
artificial intelligence, neural networks, expert systems, automated diagnosis, foot pathologies, pedobarography, 385
endurance
muscle fatigue, neck–shoulder disorders, muscle rotation, biomechanical model, electromyography, arm flexion, shoulder load, 309
exercise
bone–ligament junction, biomechanics, histomorphometry, streptozotocin, rat, diabetes (type 1, insulin dependent), 331
spine, pregnancy, posture, back pain, 98, 104
exercise protocols
iso inertial dynamometry, 379
expert systems
automated diagnosis, foot pathologies, pedobarography, EMED, artificial intelligence, neural networks, 385
extension
cineradiography, lumbar spine, intervertebral disc, continuous deformation behaviour, *in-vivo*, strain distribution, flexion, 193
external fixation
biomechanics, comparison, 401
biomechanics, histology, dynamization, bone healing, 227
extracorporeal shock-waves
callus, fracture, fracture repair, physical stimulation, 374
failure mechanisms
fracture toughness, osteochondral failure impact shear loading, 156
failure properties
histology, ACL, biomechanics, elongation rate, 428
falls
kinesiology, biomechanics, balance, posture, 318
fat-suppression
patella, knee-joint, biomechanics, functional adaptation, osteoarthritis, cartilage thickness, articular cartilage, magnetic resonance imaging, FLASH-sequence, 434
femoral fixation strength
osteoporosis, dynamic hip screw, biomechanical study, bone mineral density, femoral neck strength, 304
femoral neck fractures
hip fractures, bone fracture strength, impacted fractures, 268
femoral neck strength
femoral fixation strength, osteoporosis, dynamic hip screw, biomechanical study, bone mineral density, 304
FLASH-sequence
fat-suppression, patella, knee-joint, biomechanics, functional adaptation, osteoarthritis, cartilage thickness, articular cartilage, magnetic resonance imaging, 434
flexion
extension, cineradiography, lumbar spine, intervertebral disc, continuous deformation behaviour, *in-vivo*, strain distribution, 193
fluoroscopy
video, joint mechanics, knee, 85
foot orthoses
shoes, plantar fasciitis, strain transducers, plantar aponeurosis, longitudinal arch support, biomechanics, 245
foot pathologies
pedobarography, EMED, artificial intelligence, neural networks, expert systems, automated diagnosis, 385
force measurement
posture, human strength, three-dimensional exertion, postural stability diagram, 21
force plate
lift, load, lower back, motion analysis, biomechanics, 407
force-displacement curves
tibiofemoral displacement, knee arthrometer, Lachman's test, 93
force-velocity
muscle, spinal cord injury, electrical stimulation, architecture, neuroprosthesis, 149
forces
gait, knee, moment, osteoarthritis, osteotomy, prosthesis, radiology, surgery, biomechanics, 217
fracture
fracture repair, physical stimulation, extracorporeal shock-waves, callus, 374
fracture healing
non-invasive, mechanical, functional brace, electrogoniometer, fracture stiffness, tibia, 395
fracture repair
physical stimulation, extracorporeal shock-waves, callus, fracture, 374
fracture stiffness
tibia, fracture healing, non-invasive, mechanical, functional brace, electrogoniometer, 395
fracture toughness
osteochondral failure, impact shear loading, failure mechanisms, 156
frequency of lifting
repetitive lifting, motion range, motion analysis, weight of lifting, pattern of movement, 122
functional adaptation
osteoarthritis, cartilage thickness, articular cartilage, magnetic resonance imaging, FLASH-sequence, fat-suppression, patella, knee-joint, biomechanics, 434
functional brace
electrogoniometer, fracture stiffness, tibia, fracture healing, non-invasive, mechanical, 395
gait
kinematics, kinetics, slope walking, 79
knee, moment, osteoarthritis, osteotomy, prosthesis, radiology, surgery, biomechanics, forces, 217
gait analysis
elderly, physical activity, muscular strength, 41
gait assessment
neural networks, multivariate analysis, pattern recognition, 179
goniometry
posture, lumbar spine, back pain, lumbar lordosis, 222
hip fractures
bone fracture strength, impacted fractures, femoral neck fractures, 268
histology
ACL, biomechanics, elongation rate, failure properties, 428
dynamization, bone healing, external fixation, biomechanics, 227
histomorphometry
streptozotocin, rat, diabetes (type 1, insulin dependent), exercise, bone–ligament junction, biomechanics, 331
human strength
3-D PSD, asymmetry, TAFS, triaxial measurement, 59
posture, three-dimensional exertion, force measurement, postural stability diagram, 21
image guidance
computer-assisted surgery, pedicle fixation, clinical evaluation, spine surgery, 293
impact loading
shock, acceleration, orthotics, locomotion, pronation, 253
impact shear loading
failure mechanisms, fracture toughness, osteochondral failure, 156
impacted fractures
femoral neck fractures, hip fractures, bone fracture strength, 268
in vitro
lumbar spine, lumbar extension, creep, 363
in vivo
ankle joint biomechanics, ankle laxity, 278
patellofemoral joint, videofluoroscopy, surgery simulation, Maquet procedure, 115
in-vivo
strain distribution, flexion, extension, cineradiography, lumbar spine, intervertebral disc, continuous deformation behaviour, 193
instrumentation
measurement, rehabilitation, muscle, 283
intersegmental mobility
lumbar spine geometry, predictive model, 413
intervertebral disc
continuous deformation behaviour, *in-vivo*, strain distribution, flexion, extension, cineradiography, lumbar spine, 193
iso inertial dynamometry
exercise protocols, 379
isokinetic
knee, joint load, rehabilitation, biomechanics, 208
isokinetic lift
psychophysical lift, back muscle endurance, back strength test correlation, 325
isokinetic strength
isometric strength, pulling speed, preferred arm, arm angle, 110
isokinetics
shoulder, muscle, strength, 369
isometric strength
isokinetic strength, pulling speed, preferred arm, arm angle, 110
isometry
kinematics, knee surgery, ACL reconstruction, ligament tension, 200
joint load
rehabilitation, biomechanics, isokinetic, knee, 208
joint mechanics
fluoroscopy, video, knee, 85
kinematics
gait, kinetics, slope walking, 79
knee surgery, ACL reconstruction, ligament tension, isometry, 200
muscle fatigue, biomechanics, shoulder joint, 144
shoulder abduction, scapulohumeral rhythm, scapular plane, shoulder load, 137
kinesiology
biomechanics, balance, posture, falls, 318
knee, ankle, electrogoniometer, 275
kinetics
gait, kinematics, slope walking, 79
knee
ankle, electrogoniometer, kinesiology, 275
fluoroscopy, video, joint mechanics, 85
joint load, rehabilitation, biomechanics, isokinetic, 208
moment, osteoarthritis, osteotomy, prosthesis, radiology, surgery, biomechanics, forces, gait, 217
knee arthrometer
Lachman's test, tibiofemoral displacement, force-displacement curves, 93
knee laxity
anterior cruciate ligament, electromyography, arthrometer, 421
knee surgery
ACL reconstruction, ligament tension, isometry, kinematics, 200
knee-joint
biomechanics, functional adaptation, osteoarthritis, cartilage thickness, articular cartilage, magnetic resonance imaging, FLASH-sequence, fat-suppression, patella, 434

- Lachman's test
tibiofemoral displacement, force-displacement curves, knee arthrometer, 93
- lift
load, lower back, motion analysis, biomechanics, force plate, 407
- lifting techniques
biomechanical model, low back pain, spine, 128
- ligament tension
isometry, kinematics, knee surgery, ACL reconstruction, 200
- limb lengthening
skeletal muscles, biomechanical properties, 263
- load
lower back, motion analysis, biomechanics, force plate, lift, 407
- locomotion
pronation, impact loading, shock, acceleration, orthotics, 253

midfoot, sensory input, pressure distribution, walking, 271

sacroiliac joint
mobility *in vivo*, motion axes, 352

scapular plane
kinematics, shoulder abduction, scapulohumeral rhythm, shoulder load, 137

scapulohumeral rhythm
scapular plane, shoulder load, kinematics, shoulder abduction, 137

sensory input
pressure distribution, walking, running, midfoot, 271

shock
acceleration, orthotics, locomotion, pronation, impact loading, 253

shoes
plantar fasciitis, strain transducers, plantar aponeurosis, longitudinal arch support, biomechanics, foot orthoses, 245

shortening reaction
maintained stretch, collagen, viscoelasticity, range of motion, ankle joint mechanics, 166

shoulder
muscle, strength, isokinetics, 369

shoulder abduction
scapulohumeral rhythm, scapular plane, shoulder load, kinematics, 137

shoulder joint
biomechanics, kinematics, muscle fatigue, 144

shoulder load
endurance, muscle fatigue, neck-shoulder disorders, muscle rotation, biomechanical model, electromyography, arm flexion, 309

kinematics, shoulder abduction, scapulohumeral rhythm, scapular plane, 137

sitting
abdominal muscle, posture, car seat, 73

stumps
tissue loading, muscle forces, modelling, lumbar spine, 184

skeletal muscle
viscoelasticity, viscoplasticity, 258

skeletal muscles
biomechanical properties, limb lengthening, 263

slope walking
gait, kinematics, kinetics, 79

spinal cord injury
electrical stimulation, architecture, neuroprosthesis, muscle, force-velocity, 149

spinal mechanics
review, back pain 3

spine
biomechanical model, lifting techniques, low back pain, 128

pregnancy, posture, exercise, back pain, 98, 104

spine surgery
image guidance, computer-assisted surgery, pedicle fixation, clinical evaluation, 293

standardization
anatomical frames, movement analysis, terminology, 171

static endurance
low-back pain, risk factor, 323

stiffness
bodyweight, physiological loading, anterior cruciate ligament, mechanics, strength, 339

strain distribution
flexion, extension, cineradiography, lumbar spine, intervertebral disc, continuous deformation behaviour, *in-vivo*, 193

strain transducers
plantar aponeurosis, longitudinal arch support, biomechanics, foot orthoses, shoes, plantar fasciitis, 245

strength
isokinetics, shoulder, muscle, 369

stiffness, bodyweight, physiological loading, anterior cruciate ligament, mechanics, 339

streptozotocin
rat, diabetes (type 1, insulin dependent), exercise, bone-ligament junction, biomechanics, histomorphometry, 331

surgery
biomechanics, forces, gait, knee, moment, osteoarthritis, osteotomy, prosthesis, radiology, 217

surgery simulation
Maquet procedure, patellofemoral joint, videofluoroscopy, *in vivo*, 115

TAFS
3-D PSD, asymmetry, human strength, triaxial measurement, 59

tendinitis

tendon biomechanics, creep, computer keyboard, 67

tendon
biomechanics, mesoscopic approach, 50

tendon biomechanics
creep, tendinitis, computer keyboard, 67

terminology
standardization, anatomical frames, movement analysis, 171

three-dimensional exertion
posture, human strength, force measurement, postural stability diagram, 21

tibia
fracture healing, non-invasive, mechanical, functional brace, electrogoniometer, fracture stiffness, 395

tibiofemoral displacement
force-displacement curves, knee arthrometer, Lachman's test, 93

tissue loading
muscle forces, modelling, lumbar spine, situps, 184

torsion testing
long bones, biomechanics, 441

triaxial measurement
3-D PSD, asymmetry, human strength, TAFS, 59

video
fluoroscopy, joint mechanics, knee, 85

videofluoroscopy
patellofemoral joint, *in vivo*, surgery simulation, Maquet procedure, 115

viscoelasticity
viscoplasticity, skeletal muscle, 258

viscoplasticity
skeletal muscle, viscoelasticity, 258

walking
rearfoot motion, 2-dimensional analysis, 3-dimensional analysis, 36

running, midfoot, sensory input, pressure distribution, 271

weight of lifting
repetitive lifting, motion range, motion analysis, frequency of lifting, pattern of movement, 122
